

Introduction

The SWE society app is a simple platform for members of the Software Engineering department to connect, share updates, and access archived content. This document provides a high-level overview of the system requirements.

Purpose

The purpose of this application is to :

- Provide a centralized platform for communication and updates
- Help users find and connect with other members
- Store and display media related to society activities

Functional Requirements

- User Account System
- Newsfeed
- Search system
- Gallery Archive

Non-Functional Requirements

- Easy to use and user-friendly interface
- Basic security for user data and authentication
- Good performance
- Scalable and maintainable for future growth

Scope

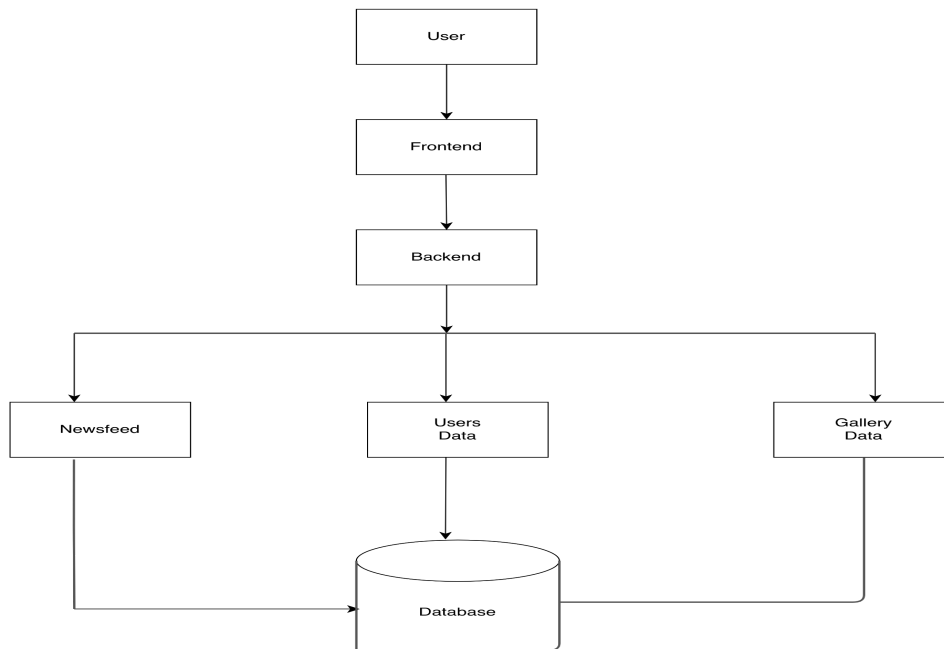

The system will provide a mobile based application with basic social and informational features. The system is expected to evolve over time, so requirements may change.

Key Features

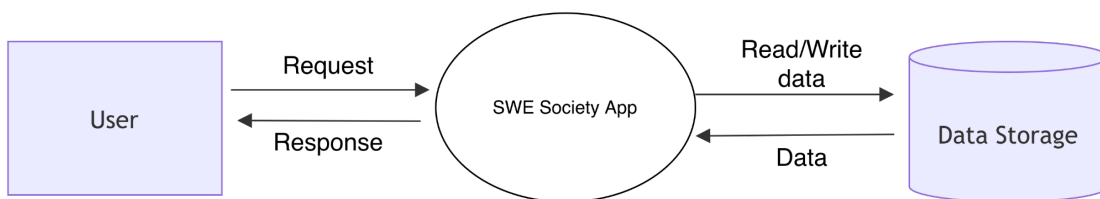

- Newsfeed
- Search system
- Gallery archive

- Account system(login and logout)
